Discovering Frogs And Toads - tcstr.vxfi.blog.mredison.co

Piles of rocks and logs give frogs and toads spaces to shelter in during winter, opportunities to escape from predators and offer shade in hot summers. Gaps under paving slabs or sheds will too. They are also great places for frogs and toads to forage in for food. So are tall plants and piles of grass or leaves, which also help amphibians keep cool.

Ways to help frogs and toads | Natural History Museum

Frogs have smooth, moist skin and long, stripy legs and are likely to be found in damp habitats in the garden. Toads have warty skin, golden eyes and prefer to crawl rather than hop; if threatened a toad can puff itself up to appear bigger. Toads can tolerate drier habitats than frogs and spend less time in water.
