Netbackup 71 Documentation - modapktown.com

Status 71 is a common error on NBU 7 platform. This could happen because you have ALL_LOCAL_DRIVES in the backup selection and using multi-streaming, and on the actual client you have excluded a drive (e.g. E completely. The backup job for the E: drive would end with a status 71, as it didn't find any eligible files/folders to be backed up.
