In May, the Office for National Statistics announced that UK inflation had reached levels not seen since 1982. The 9% overall rise in consumer prices in the 12 months to April, 2022—the highest in the G7—was driven largely by an enormous jump in energy and transport costs, but the cost of food and non-alcoholic beverages rose by 6.7%, the highest 12-month increase since 2011.
