iPaaS vs. ESB vs. API management. While the lines have become less blurred over the years, many organizations still debate whether to use iPaaS or an enterprise service bus to handle their integration needs. Most modern ESBs can handle SaaS applications but are best for integration of legacy, on-premises and primarily internal applications.

What is iPaaS? Guide to integration platform as a service

The Oracle Certified Professional (OCP) MySQL 5.6 Developer credential identifies developers who write applications for MySQL database servers. This cert has no prerequisites, but Oracle recommends that you take the MySQL for Developers course. The single exam focuses on practitioner-level skills in all aspects of developing MySQL applications ...
