Plain Text Document
In computing, plain text is a loose term for data (e.g. file contents) that represent only characters of readable material but not its graphical representation nor other objects (floating-point numbers, images, etc.).It may also include a limited number of "whitespace" characters that affect simple arrangement of text, such as spaces, line breaks, or tabulation characters (although tab ...

Plain text - Wikipedia
A text file (sometimes spelled textfile; an old alternative name is flatfile) is a kind of computer file that is structured as a sequence of lines of electronic text.A text file exists stored as data within a computer file system.In operating systems such as CP/M and MS-DOS, where the operating system does not keep track of the file size in bytes, the end of a text file is denoted by placing ...

Text file - Wikipedia

Plain text, Plain-text, or Plaintext is any text, text file, or document containing only text. Unlike a rich-text document, a plain text file cannot have bold text, fonts, larger font sizes, or any other special text formatting.The picture is a visual example of plain text vs. formatted text. Most associate plain text files with the file extension.txt on Microsoft Windows computers, however ...

What is Plain Text? - Computer Hope

The opposite of plain text is rich text, which takes on various formatting characteristics that are not found in plain text. Here are the attributes often found in rich text, but not in plain text: Font Size and Headings: How large or small the text is and whether it is a "header" element that opens a section or a "paragraph" element ...
