Pregnancy. Being pregnant during the COVID-19 pandemic can be stressful, and it is natural to worry about the effects of the virus on your pregnancy and unborn baby. COVID-19 is a new disease and we are still learning how it affects pregnant women. Currently, there is no evidence that suggests pregnant women are at a higher risk of getting COVID-19 or if acquired, having more serious illness.

Pregnancy Birth and Baby

{ meta.og description }

Pregnancy Birth and Baby

Chronic poorly-controlled high blood pressure before and during pregnancy puts a pregnant woman and her baby at risk for problems. It is associated with an increased risk for maternal complications such as preeclampsia, placental abruption (when the placenta separates from the wall of the uterus), and gestational diabetes.
