#### Rearing Young Ruminants On Milk Replacers And Starter ...

Research in Cyprus (Louca, Mavrogenis, Lawlor, 1975) has shown there is very little difference in growth of young goats that are raised by their dam or fed milk replacer, unless weaned at a young age (35 days). With early weaning, kids raised by their dams were heavier than those fed milk replacer.

#### 10+ Rearing Young Ruminants On Milk Replacers And Starter ...

Rumination, or 'chewing the cud', is a good sign of rumen development in milk-fed, calves. The inclusion of roughage in the diet allows for earlier weaning. However, calves must, consume high energy/protein concentrates for growth as well as rumen development. 24Rearing Young Stock on Tropical Dairy Farms in Asia.
