Now that you are familiar with the concept of secondary succession and have reviewed some examples, it's a great time to continue learning more about science in the world around you. Start by exploring examples of chemical changes in everyday life. If that topic catches your attention, move on to common examples of solutions in everyday life.

Examples of Secondary Succession in the Natural World

The mature tree produces fruits, which contains seeds inside it. The seeds sprout in the presence of soil and water. The sprouting seed grows leaves and roots at the top and bottom. After few days of growth the sapling become a small tree. When the apple tree matures and becomes large enough to bear fruits thus it's life cycle starts again.
